Profile

Aspiring Computer Science Diploma student passionate about software development and exploring new technologies. Familiar with Java, C++, Python, Spring Boot, REST APIs, and MySQL through academic and personal projects. Enjoy applying technical skills to build practical solutions and looking forward to learning, contributing, and growing through internship and real-world development opportunities.

Technical Skills

Languages: Java, Python, SQL, C++

Backend Development: Spring Boot, REST APIs

Database: MySQL

Tools & Platforms: Git, GitHub, Vercel, Railway

Core Concepts: Object-Oriented Programming, Operating Systems, File Handling, System Programming, Computer Networks, API Integration

Project Experience

FinSight – AI Powered Finance Tracking System

2026

Java, Spring Boot, REST APIs, Spring Security

GitHub Backend | GitHub Frontend

- Developed a backend system designed to generate intelligent financial insights using secure authentication, API integrations, and AI-based processing. Deployed Backend on Railway and Frontend on Vercel.
- Implemented token-based email verification using UUID activation and integrated Brevo Email API for dynamic email communication.
- Consumed external APIs including OpenRouter API and Finnhub API using RestTemplate for AI-driven financial analysis and market data retrieval.
- Built custom intent detection and conditional API routing to optimize request handling and reduce unnecessary API calls.
- Designed scalable layered architecture using Controller, Service, and Repository pattern.

NOVA – Virtual Assistant

2025

C++, OOP, File Handling

GitHub Repository

- Developed a command-based virtual assistant in C++ with features for system automation, voice interaction, and productivity tasks.
- Implemented functionalities such as opening applications/websites, text-to-speech interaction, note management, calculator operations, dictionary lookup, and date/time retrieval.
- Applied object-oriented programming principles with modular class-based architecture for task management and command handling.
- Integrated file handling and system-level operations to improve functionality and user interaction.

Certifications & Achievements

- Completed Python Basics certification from Infosys Springboard.
- Successfully completed a high-altitude trekking expedition to the Kalsubai Peak, the highest peak in Maharashtra, demonstrating endurance, discipline, and teamwork.
- Secured 2nd Runner-Up position in a State-Level Abacus Competition as a representative of Aloha Abacus Institute.

Education

Cusrow Wadia Institute of Technology

Diploma in Computer Science Engineering (Direct Second Year Entry)

2025 – 2027(Pursuing)

Current 3rd Semester Percentage: 93%

Amrita Vidyalayam

Higher Secondary Certificate (Science)

2024 – 2025

Percentage: 80%

S. S. Ajmera High School & Junior College

Secondary School Certificate (SSC)

2022 – 2023

Percentage: 92%
